

GUNDERSEN HEALTH SYSTEM

2018 INPATIENT REHABILITATION STROKE OUTCOMES REPORT

Inpatient Rehabilitation at Gundersen helps patients regain as much function and independence as possible after a stroke. From January 2018 to December 2018, Gundersen served 115 stroke patients, 28% of our total inpatient rehab population.

When selecting an inpatient rehab program it's useful to look at outcome measures like these to judge the effectiveness of the program.

% of patients treated for stroke from January 2018 to December 2018

Gundersen	Region	Nation
27.6%	26.8%	23.6%

% of patients likely to recommend inpatient rehab to others

More than 80 percent of patients surveyed said they would be very likely to recommend Gundersen Inpatient Rehabilitation to their friends and family.

Our patients by age

Age Group	Gundersen	Region	Nation
0 – 17	0.0%	0.0%	0.1%
18 – 64	36.5%	38.0%	38.1%
64 – 74	27.0%	29.4%	28.9%
75+	36.5%	32.6%	32.9%

Physical (PT), Occupational (OT) and Speech Therapy (SLP) ave. min. by stroke patients per day

Average PT Minutes	Average OT Minutes	Average SLP Minutes
60 – 90 minutes/day	60 – 90 minutes/day	30 – 60 minutes/day

For more information about any of these outcome measures or our Inpatient Rehab program, call (608) 775-3261 (ext. 53261 from an inside phone) or visit gundersenhealth.org/inpatient-rehabilitation.

2018 INPATIENT REHABILITATION STROKE OUTCOMES REPORT

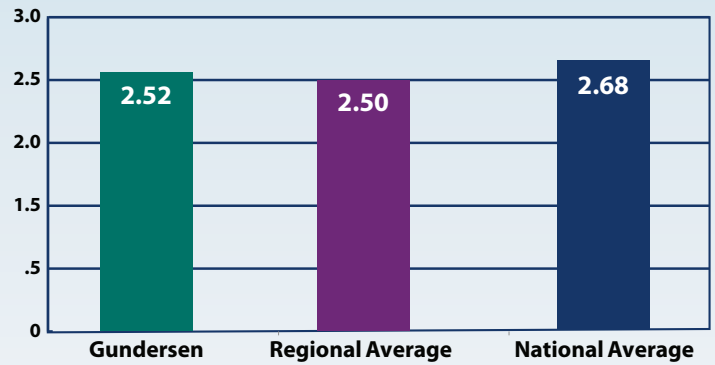

Functional Independence Measurement (FIM)

FIM is a nationally recognized measure of a patient's functional abilities in areas such as eating, grooming, toileting, transfers, mobility, communication and cognitive skills.

FIM improvement from admission to discharge (higher # is better)

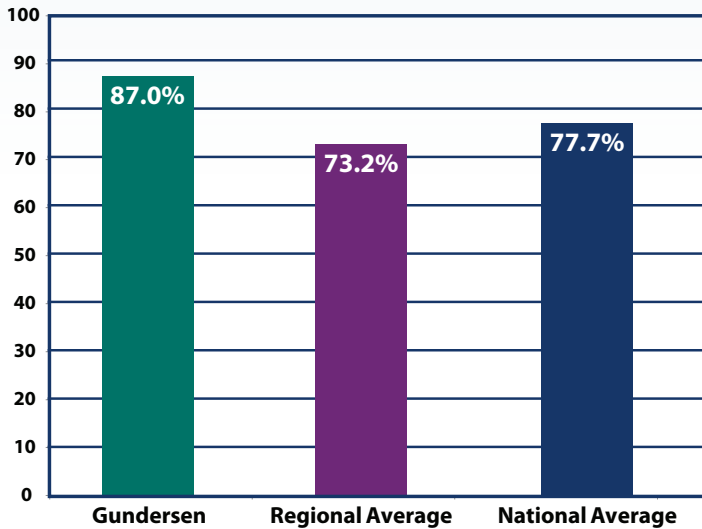

Length of stay efficiency (as relates to FIM; higher # is better)

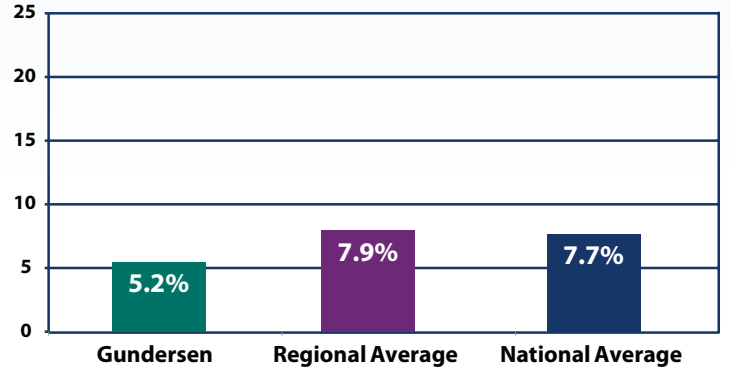

Discharge

While Gundersen's stroke patients had a similar length of stay, FIM change for stroke patients was higher than both the regional and national average (see grid above) and our discharge to community far exceeded both regional and national numbers.

% discharged to community (higher % is better)

% discharged to acute hospital (lower % is better)

Inpatient Rehabilitation • (608) 775-3261
