

# My Trip to the Hospital

Gundersen Boscobel  
Hospital

I am going to see the doctor.

First we will  
park the car.

The big doors  
will open so  
we can walk in.

There will be a  
desk with lots  
of bright lights.

We will check in at  
the desk so they  
know I am here.

We will work to support  
your loved one during  
his or her visit.

**Please let us know if he or she has:**

- Autism spectrum disorder
- Sensory processing challenges
- Mental health needs
- Developmental delays

**GUNDERSEN**  
BOSCOBEL AREA  
HOSPITAL AND CLINICS

I might see other people  
who are hurt or sick.

A nurse will call my  
name when it is time  
to see the doctor.

The nurse will  
take us into  
my own room.

The nurse will  
measure how tall I  
am...

...and see how  
much I weigh.

I might smell  
something I  
do not like.

There might be  
machines that make  
beeping noises.

I will wait in a room.  
My family can stay  
with me there.

Hospital staff wear  
badges. A badge  
means they are here  
to help me.

I will wait for the  
doctor or nurse.  
They want me  
to feel better.

The doctor or nurse  
will need to touch me  
to figure out why I  
am sick or hurt.  
I will be safe.

The doctor may need  
to look in my ears.

The doctor is there  
to help me so I  
shouldn't be afraid.

I may need to have  
lab work done.

I may also need to  
have X-rays.

There are  
lots of  
special  
machines.

They are cool.

When the doctor says I am better,  
I can go home.
