

Life-Saving Support for Businesses

Get American Heart Association (AHA) certification courses onsite at your business! The Gundersen Integrated Center for Education provides Heartsaver first aid, cardiopulmonary resuscitation (CPR), automated external defibrillator (AED) and Basic Life Support (BLS) training.

Heartsaver First Aid, CPR/AED and First Aid CPR/AED courses range from two-four hours and can be selected to meet the needs of your workplace requirements. This course is preferred for those with limited or no medical training. Upon successful completion of the course, participants will receive a two-year AHA course completion certification.

BLS is a four-hour course that covers CPR, AED, use of a bag mask and foreign-body airway obstruction in both adults and infants. This course is preferred for those in healthcare or need a wide variety of in-facility and prehospital training. Upon successful completion of this course, participants will receive a two-year AHA course completion certification.
